Tobacco includes over 200 kinds of harmful material that cause cancer, cardiac disorder, chronic obstructive pulmonary disease (COPD) and so on. You can have your lungs’ age measured or have a health consultation. Let’s quit smoking to protect your health from its harm.

Information

Report on the Condition of Garbage Discharge

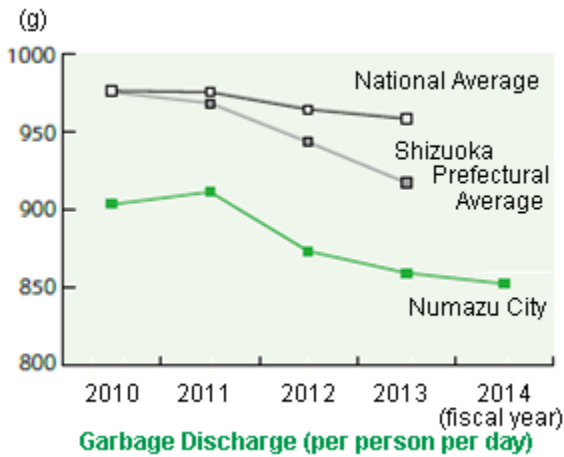

Inquiries: Garbage Control Promotion Division, ☎ 055-934-4743

◆ Total Amount of Garbage Discharge

The total amount of garbage discharge in Numazu City in the fiscal year 2014 was 60,632 tons, which includes burnable, landfill waste, plastic containers and packing, thermal recycling plastic and recyclable garbage. Converted into the amount per person per day, it becomes 852 g which is below the national and prefectural average.

About 60 percent of the weight of burnable garbage is water. Please drain excess water from kitchen waste to enable significant reduction of the amount of garbage. Numazu City would be grateful for your continued cooperation in waste reduction.

We have achieved good results with your understanding and cooperation

◆ Composition Analysis of Plastic Containers and Packaging

Numazu City recycles plastic containers and packaging collected in the city. Composition analysis is conducted periodically to check for proper garbage separation, because plastic containers and packaging containing dirt and foreign matter cannot be recycled. In the fiscal year 2014 the average rate of proper garbage separation was 94.1 percent, but dangerous materials such as razor blades and lighters were found mixed in it. If dangerous materials and foreign matter are found frequently in the plastic containers and packaging collected, they may not be taken over for recycling by recycling manufacturers. We ask for your cooperation in proper garbage separation for recycling.

How to Properly Sort and Dispose of Garbage and Recyclable Resources

- ☞ The identification mark for the plastics containers and packaging is called the “Pla-mark” . If you are not sure whether something is plastic or not, please check for the “Pla-mark” on it.
- ☞ Plastic containers and packaging that are dirty cannot be recycled. If they are not clean, rinse them with water before putting them out. Any plastics that cannot be cleaned are to be set out with burnable trash on burnable garbage collection days.

Hazardous Materials Safety Week: June 7(Sun) ~ 13(Sat)

Inquiries: Fire Prevention Division ☎ 055-920-9101

These days more dangerous accidents happen. They are caused by a spray-can and by the improper treatment of gasoline at self-styled gas stations. We should pay more attention to the instructions for the use of them.

*PR activity is held at JR Numazu Station on June 8(Mon).

Prepare for Landslide Disasters: June is Landslide Disaster Prevention Month

Inquiries: River Maintenance Division ☎ 055-934-4786

A landslide disaster is a natural disaster caused by terrible rain or earthquake. It might threaten to damage our life and property.

<“*Dosha Saigai Keikai Joho* (heavy rain warning message)”>

Shizuoka Meteorological Observatory and the prefecture are to issue “*Dosha Saigai Keikai Joho*” when there is a growing risk of landslide disasters because of a heavy rain. This information will urge you to escape as soon as possible and prevent loss of human life caused by landslide disasters.

<How to inform the Joho>

on TV or radio news and a news flash / on the municipal wireless communication system

<We should prepare for landslide disasters regularly>

① Check the landslide hazardous areas.

There are 285 landslide hazardous areas in Shizuoka pref. You can check the hazardous areas on the prefectural government website. <http://www.pref.shizuoka.jp/kensetsu/ke-350/>

You can also check the hazard map on the city website.

② Make sure where the shelters are and how you get there.

③ Pay attention to TV and radio news.

④ Prepare disaster supplies.
