The total amount of garbage discharge in Numazu City in fiscal year 2015 was 62,312 tons, which includes burnable, landfill waste, plastic containers and packing, thermal recycling plastic and recyclable garbage. Converted into the amount per person per day, it becomes 852 g which is below the national and prefectural average.

About 60 percent of the weight of burnable garbage is water. Please drain excess water from kitchen waste to enable significant reduction of the amount of garbage. Numazu City would be grateful for your continued cooperation in waste reduction.

◆ **3 kiri Campaign**

Food waste accounts for half the amount of burnable garbage. It often includes unopened food. Also, about 80 percent of food waste is moisture.

Let's start "3 kiri campaign" and reduce wasteful spending as well as garbage.

Tsukai-kiri (Use up): Don't buy too much food. Use up what you buy.
 Tabe-kiri (Eat all): Don't cook too much. Keep food properly.
